RULES AND REGULATIONS

AMENDMENT

FEB. 24, 2012

AB. WATER DAMAGE CAUSED BY OWNER NEGLIGENCE

In 2011 the Florida legislature made changes in the Condominium Association responsibilities for water damages. As a result the Association needs to clarify the responsibility of the Association and the Owner in this case. The following rules define Owner responsibility in accordance with the new Florida Statutes.

If a leak occurs as a result of any of the below items, the Owner will be held strictly liable for all damage caused to the Unit, common elements, Association property, other Units or other property damaged by such leak. Failure to do these items is prima facie evidence of negligence and makes the Unit Owner liable for all resulting damage.

When a Unit is unoccupied for more than 48 hours the Owner must shut off the water at the Unit's main valve (most valves are located near the water heater).

The drain line of the Owner's air conditioning unit is required to be vacuumed or blown out and cleaned at least once each year (your service company will know). The Owner must maintain the service documents that state the yearly cleanout service was provided.

Owners are required to have all water supply hoses made from metal piping or metal braided hoses. These include washing machines, refrigerators, dish washers, toilets, kitchen/bath room/utility room sinks and water filters.

Dishwashers are to be replaced after 14 years and refrigerators after 10 years.
